C;Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 21-Jul-2000
C;Accession: S75761
R; Kaneko, T.; Sato, S; Kotani, H.; Tanaka, A.; Asamizu, E.; Nakamura, Y.; R

N;Alternate names: protein slr0574
N;Contains: oxidoreductase (EC 1.-.-)

cytochrome P450 - Synechocystis sp. (strain PCC 6803)

R;Kaneko, T.; Sato, S.; Kotani, H.; Tanaka, A.; Asamizu, E.; Nakamura, Y.; Miyajima, o, K.; Okumura, S.; Shimpo, S.; Takeuchi, C.; Wada, T.; Watanabe, A.; Yamada, M.; Yas DNA Res. 3, 109-136, 1996
A;Title: Sequence analysis of the genome of the unicellular cyanobacterium Synechocys

A; Reference number: S74322; MUID:97061201 A; Accession: S75761

```
C;Genetics:
A;Gene: Cyp
C;Superfamily: Synechocystis cytochrome P450 slr0574; cytochrome P450 homology
C;Superfamily: Synechocystis cytochrome P450 slr0574; cytochrome P450 homology
C;Keywords: chromoprotein; heme; iron; metalloprotein; oxidoreductase
C;Keywords: chromoprotein; heme; iron; metalloprotein; oxidoreductase
F;251-413/Domain: cytochrome P450 homology <P45>
F;391/Binding site: heme iron (Cys) (axial ligand) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        A;Molecule type: DNA

A; Title: Sequence and analysis of chromosome 1 of the plant Arabidopsis.
A; Reference number: A86141; MUID:21016719
A; Accession: H86185
A, Status: preliminary
A; Molecule type: DNA
A, Residues: 1-490 (STO)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            nypothetical protein [imported] - Arabidopsis thaliana

cytochrome P450 4D2 - fruit fly (Drosophila melanogaster)
N;Contains: oxidoreductase (EC 1.-.-)
C;Species: Drosophila melanogaster
C;Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 21-Jul-2000
C;Accession: S41192; S34291
R;Frolov, M.V.; Alatortsev, V.E.
submitted to the EMBL Data Library, December 1993
A;Description: A cluster of cytochrome P450 genes in the X-chromosome of Dro

in the X-chromosome of Drosophila

RESULT S41192

```

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Perfect score:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    on:
   pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

"Mouse p450RAI (CYP26) expression and retinoic acid-inducible retining acid metabolism in F9 cells are regulated by retinoic acid receptor retining and retinoid x receptor alpha.";

L J. Biol. Chem. 273:2409-2415(1998).

-! FUNCTION: PLAKS A KEY ROLE IN RETINOIC ACID METABOLISM. ACTS OF RETINOIDS, INCLUDING ALL-TRANS-RETINOIC ACID (RA) AND ITS STEREOISOMER 9-CIS-PA. CAPABLE OF BOTH 4-HYDROXYLATION AND 18-CHYDROXYLATION, RESPONSIBLE FOR GENERATION OF SEVERAL HYDROXYLATION: MEMBRANG-BOUND. ENDOPLASMIC RETICULUM.

C -!- SUBCELLULAR LOCATION: MEMBRANG-BOUND. ENDOPLASMIC RETICULUM.

C -!- SUBCELLULAR LOCATION ACIDS (RA).

-! SIMILARITY: BELONGS TO THE CYTOCHROME P450 FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     MGD; MGI:1096359; Cyp26.

TISSUE SPECIFICITY: EXPRESSED IN ROOTS, DEVELOPING LEAVES,
VEGETATIVE MERISTEM, AND SUSPENSION CULTURE CELLS.
SIMILARITY: BELONGS TO THE CYTOCHROME P450 FAMILY.
